

News Release

CubelQ announces the launch of totally new EMV card personalization application

Athens, GR, **September 23, 2008** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, today announces the launch of a totally new EMV card personalization application under the title **CardPro**.

TechTrex's **CardPro** is the only complete EMV personalization solution in the world that is not associated with any personalization equipment vendor or card manufacturer providing the entire EMV personalization process in three distinctive modules: Data Preparation – DP, Key Management – KM and Card Production - CP.

CardPro has been designed and developed by **TechTrex Inc.** than incubates a group of IT and banking professionals consolidating many years of experience of EMV card personalization projects and solutions in NBS, UbiQ, Datacard and Gemalto (Gemplus).

CardPro is a complete smart card personalization suite, with initial focus in EMV market. It supports all popular brands of card personalization machines such as Datacard, NBS, CIM, Matica, Ruhlamat, Fargo and others. Able to use all available HSM such as SafeNet/Eracom, Thales, Atalla (HP), Bull, Futurex and other brands upon request. A wide variety of EMV smart card open platform and native drivers, more than 25, are available while any EMV card driver can be developed upon request. For installations that require so, **CardPro** can operate in line with **Thales P3™** EMV Data Preparation system receiving and returning a compatible data format.
