CubelQ Announces the Availability of New Cheque Scanners

Athens, GR, **January 2, 2009** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, today announces the availability of new cheque scanners.

Two new cheque scanners have been included in the product range of scanning devices supported by CubelQ's cheque processing application that boost flexibility and productivity.

The first scanner, manufactured by **Rototype**, model **DAB6000**, is a low cost, advanced features, desktop cheques (and other banking documents) reader scanner with small footprint, front/rear scanner, feeder, endorser, stamp, and two pockets sorter. Some of the diversified features of DAB6000 are on board OCR/MIC engine, image compression and LAN - 10/100 Ethernet port making the device a network cheque reader scanner. This last feature enables the device to be shared between multiple teller applications (or cheque processing application); an attribute that decreases the in-branch cheque processing cost without compromising any of the high performance characteristics of the device

The second scanner, manufactured by **CTS Electronics**, model **LS100/IP**, is a low cost, web enable, desktop cheques reader scanner. LS100/IP is the most compact check scanner in the market for teller and remote deposit capture applications. Some of the distinctive features of LS100/IP are 10/100 Ethernet network connectivity, full IP address, fixed or by DHCP, Net Mask and Gateway configuration capability, SSL for secure data transmission, on board Black & White image conversion and historical data and statistics as HTML pages. Device sharing and device reassignment to another workstation become very easy tasks making LS100/IP the ideal cheque scanning device for today's modern branch architectures based on thin clients and web based solutions.

About CubelQ

CubelQ Ltd. - www.cubelq.gr - is a leading provider of software solutions, systems, business process re-engineering solutions and professional services to banks, financial institutions and corporations in South and East Europe.
