CubelQ Announces the Completion of a New SkaiForms® Project

[EN] Athens, GR, **September 16th, 2009** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, today announces the completion of a new SkaiForms® project.

The customer is one of the leading international companies providing information, analytics and decision support systems to help organizations find, develop and manage customer relationships. Operating globally since 1997, with local presence in 11 countries, offers innovative solutions in **credit and procurement risk management services**. The company is well known for its expertise in establishing and managing both B2C and B2B credit bureaus, with vast experience in data and database management technology solutions, using advanced communication infrastructures is continuously investing in appropriate new and innovative technologies.

The company following its long term strategy on innovative products, invested in Anoto® technology using SkaiForms® software platform with an application designed and developed by CubelQ. The system is used for streamlining the capture and processing of handwriting information, related to credit risk management of organization and individuals. The information is collected in real time from courts around Greece. The system will provide increase in processing speed and accuracy of data, while in the same time minimizing the error ratio and the operating cost.

The system was implemented for UAT in less than two (2) months including all customization requested such as real time transfer of data to customer's databases and an extensive set of reports on system operation and personnel productivity.
