

News Release

CubelQ announces integration of Evolis printers to Card Instant Issuance Application – CiiA™

Athens, GR, **April 13, 2011** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial and corporate institutions, today announces the integration of **Evolis™** card printers to **Card Instant Issuance Application - CIIA™**, a leading software application specially designed for managing the issuance of plastic cards at remote sites such as a bank branch and merchant outlets (local – instant issuance).

Continuing our strategy for intergrading to CIIA™ card printers and embossers from different manufacturers, **Pebble4** and **Dualys3**, card personalization machines from **Evolis™** have been intergraded and fully supported in CiiA™ processing environment under its new layered architecture. **CiiA™** takes full advantage of **Pebble4** and **Dualys3** capabilities, from just printing a card, print and encode magnetic stripe cards and up to print, encode magnetic stripe and complete encode contact/contactless EMV chip cards.

Pebble4 (and **Dualys3**) is the ideal printer to instantly issue colour cards on demand or in batches. Pebble matches premium-quality graphics, with fast throughput and autonomy (150 cards per hour in colour and 1,000 in monochrome). This range of card printers come with the latest innovations in consumables and encoding, and therefore, personalizes any type of card. Pebble benefits from world-class technology that supports the most stringent standards for encoding magnetic stripes, as well as contact or contactless smart cards. The **Pebble range** proudly carries the stamp of **Evolis'** strong commitment to reliability, and benefits from unmatched quality along with a pioneering 3-year warranty (with unlimited number of printed cards).

Financial institutions, governmental agencies, healthcare organizations and educational institutions rely on Pebble to issue secured access control badges, ID cards, payment cards, loyalty cards, transit passes ... in a decentralized way. Since 2000, thanks to Pebble, Evolis succeeded in implementing several high profile projects including: **contactless transit passes** for the Metro system in Paris (Navigo); **decentralized banking card** personalization in bank branches in several countries (South Korea, Greece, Saudi Arabia ...); as well as personalized **health care cards** for millions of people living in India

Card Instant Issuance Application - CiiA™ suite is designed to operate in banks and financial institutions that are issuing or are planning to issue ATM, Cash, Debit or Credit plastic cards at their branches. As a marketing concept, CiiA™ provides significant value to banks enabling them to differentiate from competitors, upgrade the "image" of the institution, increase customer acceptance, offer better quality of service, minimize operating cost and have faster time - to - market for new products. It enables banks to deliver their cards and train their customers at the branch thus increasing customer acceptance of card usage and card products.

CiiA™ supports also card personalization machines from **CIM™** (Sunlight K3 thermal printer and Maxima 861 and 821 embossers), **FARGO™** (HDPii and HDP5000 thermal retransfer and DTC1000, DTC4000 and Persona® C30e thermal transfer printers) and **CTS Electronics™** (CPS110, CPS120, CPS1800 and CPS2000 embossers and combined thermal retransfer printers).

About Evolis:

EVOLIS – www.evolis.com – designs, manufactures and markets a complete range of solutions for personalization of plastic cards. These printers integrate all the options necessary for incorporating graphic, magnetic and electronic personalization (smart cards, with contact and contactless RFID technology) of all types of cards (payment cards, transit passes, loyalty cards, etc.). Based in France, with subsidiaries in Miami (USA) and Singapore, and representative offices in Tokyo (Japan) and Shenzhen (China), Evolis is represented in more than 100 countries in the world via a network of importers, distributors and technology integrators.
