CubelQ Announces the Completion of a New Consumer Loyalty Project

[EN] Athens, GR, **June 11th, 2012** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces the completion of new consumer loyalty project.

The consumer loyalty project is based on **Advantage™ Consumer Loyalty & Electronic Purse Application Platform** and has been implemented in a **marketing firm in Athens Greece focusing to marketing functions in municipal geographical regions**. First phase rollout includes **Advantage™** client installation in 170 merchant locations.

Loyalty part of **Advantage™** is installed implementing two loyalty games.

The first game is the **“localized dynamic discount”** scheme. Cardholders receive discounts on each purchase which is defined from the system dynamically, based on product/service category and locally, based on merchant location (shop). Products and/or services and the corresponding discounts in each merchant location are listed in the system, defined initially by the merchant during its registration procedure and changed any time the merchant requires so.

The second game is the **“standard points”** game. Cardholders collect point on each purchase. Amount to points' calculation formula is same for all participating merchant and for all purchases from the cardholders. Accumulated points are used to receive predefined by the scheme owner gifts and to participate to end-of-year draws for very expensive gifts.
