CubelQ Announces HID Global's Release of Enhancements to ActivID® Threat Detection Service

[EN] Athens, GR, **March 17th, 2015** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces **HID Global's** release of enhancements to its award-winning **ActivID® Threat Detection Service** in conjunction with **upgrades to ActivID® Appliance 7.2.1**.

The ActivID® Threat Detection Service is an integrated part of the ActivID® Authentication Appliance, enabling **contextual-based authentication**, including advanced device identification and malware detection. The contextual-based authentication is completely transparent and does not burden IT staff with additional disparate solutions or ongoing maintenance. The ActivID® Threat Detection Service also leverages big data to stop cyber threats in real time.

The solution also simplifies the process for online security compliance, such as the latest FFIEC guidance, by implementing **layered authentication** which is invisible to end users (so that it does not interrupt the online experience). It also allows for further implementation of out-of-band authentication methods, such as via SMS and email.

In addition to protecting against account takeovers, the combined ActivID® Authentication and ActivID® Threat Detection Service solution can be used to defend against:

- Fraudulent account registration by establishing the true identity of the user and stopping the use of stolen and false IDs during account creation.
- Transaction fraud by detecting potential fraud before a transaction is approved with real-time user profiling and comprehensive examination of user identities and global behavior.

With the enhanced ActivID® Threat Detection Service, organizations can also tailor the risk-based or contextual authentication for their online applications more precisely, with access to reason codes and using the trust score that is derived based on their pre-defined business policies and rules.

The new ActivID® Threat Detection Service will be available on March 18th 2015.

More information on HID Global's solutions can be found at [Secure Online and Mobile Banking](#).
