

News Release

CubelQ Announces two New HID Global's Card Printers Part of the Professional Select Series

[EN] Athens, GR, **July 21st, 2016** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces the availability of two new HID Global's card Printers, part of the Professional Select Series, the all-in-one printing and lamination direct-to-card printer **DTC5500LMX** and the new high definition card printer **HDP5600** both of which comprise HID's new Professional Select Series of printers.

The **DTC5500LMX** provides premium printing and delivers the quickest, most cost-efficient waste-less lamination solution on the market today. The **DTC5500LMX** is the latest release in the successful line of FARGO® Direct-to-Card (DTC®) printer/encoders, and the first to utilize HID Global's iON™ technology which powers the fastest and most energy efficient lamination hardware available. The **DTC5500LMX** is the first printer on the market to be **GreenCircle®** Certified. Additionally, the **DTC5500LMX** system also uses HID Global's new waste-less PolyGuard™ LMX overlaminates, providing the highest level of card protection while reducing consumable costs by up to 50%. The new consumable design will drive savings, making **DTC5500LMX** the ideal solution for high-volume printing environments.

HID Global's new **HDP5600** features an affordable, high resolution 600 dpi printing option for superior text and image quality. Based on HID Global's industry leading, 5th generation HDP technology, it is ideal for government agencies, universities, corporations and healthcare facilities who need re-transfer printing technology to routinely issue high definition ID cards. The **HDP5600** also includes a built-in Workbench™ diagnostic utility and Color Assist™ tool to help better match spot colors on company logos and service marks. Leveraging the 600 dpi resin printing option, colors are more brilliant and images are sharper and the printer can accurately reproduce complex characters, such as Kanji, Arabic and Cyrillic.

HID Global's new Professional Select Series of printers joins the existing FARGO portfolio that includes **Value, Standard, Professional, Financial** and **Industrial** Series Printers. The Professional

Select Series products are distributed through product-certified distributors and system integrators.
