

News Release

CubelQ Announces FileOpen™ Support for Microsoft™ Office 2016 Documents

[EN] Athens, GR, July 29th, 2016 - CubelQ Limited, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces FileOpen™ support for Microsoft™ Office 2016 documents.

FileOpen™ product line for secure publishing now supports Microsoft™ Office documents, including Office 2016 and back to Office 2010 versions. FileOpen™ **RightsManager®**, **RightsServer®** and **SDK** licensees can now add the MS Office module to encrypt Word™, Excel™, and PowerPoint™ files for native viewing in their respective Microsoft™ viewers.

FileOpen's MS Office support includes advanced access controls such as:

- Restricted printing
 - Expiration by date or number of uses
 - Secure offline viewing
- ... and much more.

Encrypted Microsoft™ Office documents files can be edited by the recipient while maintaining their security, or publisher can choose to disallow editing.

FileOpen™ **RightsManager®** brings the flexibility of cloud architecture, without compromising security. Unlike most cloud-based document security offerings, with **RightsManager®** document publishers don't have to upload an unprotected document to get encrypted. Documents never leave publisher's possession until they are encrypted and safe to distribute. Then, publishers can control document permission settings and user authentications in the cloud, where they can easily make changes, even after delivery.
