

News Release

CubelQ Announces CiiA™ New Web Client

[EN] Athens, GR, **October 24th, 2016** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces a **new Web Client** for its Client/Server version of Card Instant Issuance Application – CiiA™.

Card Instant Issuance Application – CiiA™ is the leading in bank branch card issuance and personalization solution. CiiA™ Client/Server platform has been enriched with a new **Web Client** which together with the **Thick Client** and the **Thick Client without User Interface** complete the range of available CiiA™ clients.

CiiA™ Web Client with its intuitive, attractive and friendly user interface is the perfect client for fast and easy deployment of instant issuance functionality across hundreds of branches. As a web application, CiiA™ Web Client does not require installation but only network configuration to access the **CiiA™ Web Server** from the branches. **CiiA™ Web Client** supports different user roles such as “Branch Manager - BM” and “Printer Manager - PM” covering all operational, administrative and security requirements of card instant issuance in the bank branch.

Supported functionality:

- **Branch Manager:** (a) branch card inventory review, analysis and reporting, (b) card transfers in/out from branch, (c) card transfers to/from branch officers and (d) reporting on users and cards personalization.
- **Printer Manager:** (a) new card issuance request (retrieve customer data from CIF or manual data entry), (b) personalize - print authorized cards, (c) deliver to customers personalized cards, (d) own card inventory review and reporting (e) card transfers to/from branch manager and (f) reporting on cards personalization
