CubelQ Announces CiiA™ New Web Client Light Release

[EN] Athens, GR, **November 8th, 2016** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces **new Web Client Light Release** for its Client/Server version of Card Instant Issuance Application – CiiA™.

Card Instant Issuance Application – CiiA™ is the leading in bank branch card issuance and personalization solution. CiiA™ Client/Server platform has been enriched with a **new Light Release of its Web Client** which together with the **Standard Web Client**, the **Thick Client** and the **Thick Client without User Interface** provide multiple client option to end-users to choose from.

CiiA™ Web Client Light Release with its intuitive, attractive and friendly user interface has been design to provide operational simplicity in order to be used with minimum or without training. **CiiA™ Web Client Light Release** is the perfect client for fast and easy deployment of instant issuance functionality across hundreds of bank branches as well as outlets of cooperating merchants. As a web application, CiiA™ Web Client does not require installation but only network configuration to access the **CiiA™ Web Server** from the branches.

CiiA™ Web Client Light Release due to its operational simplicity supports one user role and basic card instant issuance functionality: (a) new card issuance request (retrieve customer data from CIF or manual data entry), (b) personalize - print authorized cards, (c) deliver to customers personalized cards, (d) card inventory basic review and reporting and (e) reporting on cards personalization
