CubelQ Announces Morphis' New Version of ATM Cash Management Software System

[EN] Athens, GR, **February 15th, 2017** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces Morphis' new cloud-based version of ATM Cash Management Software System.

The new software version, designed for smaller ATM operators, is affordable and easy to use; allowing ATM operators to easily manage their ATMs and cash loads as efficiently as larger organizations.

The **MorphisONLINE.net** Software as a Service (SaaS) system is a secure, cloud-based solution designed to allow users to access cash orders and cash confirmations, to view transactions in near real-time, providing "instant alerts" to cash-outs, cash loads, missed loads or terminal status messages. It even allows the operators to automatically open service tickets.

In addition, SaaS customers can provide secure access to their merchants to view and retrieve ATM operation information and reports in one place; rather than having to login to various processors to retrieve reports.

MorphisONLINE.net SaaS is now available for independent ATM deployers (IADs) worldwide. With this affordable, easy-to-use, cloud-based system, smaller IADs (including one-man ATM shops) can save time and money on everyday operations and thus focus on building their business.

About Morphis

Morphis® is the world leader in global currency supply chain management software. The Morphis software suite includes modules for CRM, cash forecasting, logistics optimization, asset management, contract management, vendor management and financial reporting. Morphis offers both on-site licensing and software-as-a-service licensing alternatives for its large-scale

enterprise systems. For smaller organizations discrete applications can be delivered via the Web. To learn more about Morphis, visit www.morphisinc.com.
