CubelQ Announces Trusted Identity Solutions and Digital Identity Authentication Services

[EN] Athens, GR, July 25th, 2017 - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces Trusted Identity Solutions and Digital Identity Authentication Services.

CubelQ Limited in cooperation with **IdenTrust Inc.** ("**IdenTrust**") enables organizations to effectively manage the risks associated with identity authentication, work interoperably with countries around the world, minimize investment in creating their own policies and legal frameworks, and deploy a spectrum of products insuring trust, smarter, faster, and more cost effectively.

IdenTrust is the global leader in trusted identity solutions, recognized by global financial institutions, government agencies and corporations around the world. As the only bank-developed identity authentication system, IdenTrust provides a unique legally and technologically interoperable environment for authenticating and using identities worldwide. The IdenTrust Trust Infrastructure is predicated on a proprietary framework that combines Policies, Legal framework, trusted Operations and Technology (P.L.O.T.) to create a comprehensive environment for issuing trusted identities. IdenTrust is the only company to provide a solution incorporating all four of these elements.

IdenTrust credentials provide three key capabilities on a global and interoperable basis:

(a) Authentication

- » Proves Identity

(b) Encryption

- » Safeguards content,
- » Ensures document integrity,
- » Eliminates pharming (man-in-the middle or DNS poisoning),

(c) Digital Signing

- » Replaces 'wet' signatures
- » Provides user-level signatures
- » Enables straight-through processing (STP) (paperless workflows)

By using these three functions alone or in combination, corporations can hold individuals within their organization accountable for creating, transferring, reading or discarding transactions, from signing contracts to initiating payments to handling complex supply chain transactions.

About IdenTrust

IdenTrust® a **HIDGlobal** subsidiary was founded by financial institutions such as Citigroup, ABN AMRO, Bankers Trust (acquired by Deutsche Bank), to name a few. Upon receiving regulatory approval, IdenTrust announced its formation as a Delaware limited liability company in April 1999. In March 2002, IdenTrust acquired **Digital Signature Trust Company** (DST) from Zions Bancorporation (Nasdaq: ZION) and the American Bankers Association. The acquisition combined the global reach of IdenTrust with the proven implementation strength of DST to provide financial institutions and their customers with the means to accomplish business objectives using digital certificates and certificate-enabled applications. **IdenTrust|DST** is one of the premier providers of digital identity authentication services to the United States federal government, numerous U.S. state governments such as Washington State, U.S. General Services Administration (GSA) as Certification Authority, the U.S. Department of Defense as External Certification Authority (ECA) as well as Energy and supply chain markets.
