CubelQ Announces a New TMK Injection System for EFT/POS Terminals

[EN] Athens, GR, July 28th, 2017 - CubelQ Limited, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces a new TMK injection system for eft/pos terminals.

Key injection Management System – KiMS™, a new TMK key injection for eft/pos terminals, is CubelQ answer to acquirers servicing multiple eft/pos brands and terminal types from each brand. With KiMS™ acquirers can inject TMKs to eft/pos terminals from more than thirty (30) eft/pos brands, using manufacturer native key injection message protocol.

KiMS™ supports all contemporary Key Types and Key Management algorithms and also supports Key Exchange with multiple Authorizations Hosts using different Key Exchange Keys with each Host. As a high secure system is accessed using dual control and supports users and user group permissions and control privileges.

KiMS™ is providing an extensive logs and reports such as (a) **Event logging and audit trail**: all keying events and authentication exchanges are logged, (b) **Audit Logs**: all key loading and key management activity are additionally recorded eliminating the need for manual record keeping, (c) **Key History**: all terminals' identification details for initial and consequently key injection are tracked per terminal ID, terminal S/N and other parameters such as operation date, manufacturer, and end-user are logged. (d) **Terminal History**: all terminals' parameters separated in four (4) groups, device parameters, owners parameters, acquirers parameters and service providers parameters are kept in a database schema and every change is logged. all logs are searchable and reportable in several electronics formats such as excel, csv, pdf, html and other upon request.

KiMS™ is a PCI PIN compliant key management system and it is also compliant with the following standards (a) FIPS 140-2 Level 3, (b) ANSI X9.24 part 1 and part 2 - TR-39, (c) RoHS and (d) FCC Part 15 – Class B. KiMS™ is also compliant with the latest version of (a) PCI PIN Security

Requirements, (b) VISA PIN Security Program Auditors Guide and (c) VISA Key Injection Facility Auditor Guide.
