CubelQ Announces OECD AEOI Reporting Software Application Release

[EN] Athens, GR, **August 4th, 2017** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces OECD Automatic Exchange of Information – AEOI reporting software application release.

CubelQ's OECD AEOI reporting software application has been developed based on OECD's Common Reporting Standard – CRS specifications described in **OECD Standard for Automatic Exchange of Financial Account Information in Tax Matters, Second Edition, published March 27th 2017** document.

CubelQ's OECD AEOI reporting software application covers also **EU regulation for Automatic Exchange of Information** (Council Directive [2014/107/EU](#) of 9 December 2014 amending Directive [2011/16/EU](#) as regards mandatory automatic exchange of information in the field of taxation) **also known as DAC2**.

OECD AEOI reporting features:

1. Autonomous web based software application with its own database schema.
2. Multiple users support. Users can reside in different departments within the financial institution.
3. Connection to different sources such as Prime Compliance Suite - PCS™ database, flat files and any other software applications' database provided that the required data structure – table/fields are disclosure and read access is granted for extraction of customers with specific citizenship status (AEOI Status).
4. Powerful search facility on the participating jurisdictions citizens' dataset. User can search using the majority of personal data field (First Name, Family Name, Address, ID Type and ID Number and other) and customer ID. Additional search fields can be added as long as they are included in the database.
5. Capability to review the data of the extracted customers with specific citizenship status (AEOI Status).

6. Users can choose to generate AEOI reports for all AEOI participating jurisdictions or for one AEOI participating jurisdiction or for a group of AEOI participating jurisdictions.
7. Also users can choose to generate AEOI reports for all extracted customers or for one of the extracted customer or a group of the extracted customers from a specific participating jurisdiction.
8. Modern and intuitive user interface which guides the users how to use the system with a “Wizard” based mechanism.
9. **“What if” Operation:** Users can operate the system up to the point to finalize AEOI reports. If the users do not finalize – generate the reports all generated data are deleted.
10. **Audit:** AEOI reports that are generated are stored in two ways: (a) the actual XML files are stored in a system’s directory tagged with the creation date and (b) the data of the reports in a system’s database table tagged also with the creation date. This is a very powerful audit trail feature.
11. A number of other features that enhance security, auditability and ease of use.
