

News Release

CubelQ Announces Cooperation Extension with Signotec GmbH

[EN] Athens, GR, **September 1st, 2017** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces Cooperation Extension with Signotec GmbH.

Following a successful completion of a complex eSignature project with mobile and stationary secure electronic signature capture devices to a prominent insurance company located in Greece, **CubelQ** and **Signotec** decided to extend their cooperation to cover several countries in East and South East Europe.

Countries covered under this cooperation extension are **Cyprus, Bulgaria, Romania, Moldova, Ukraine, Serbia, Croatia, Slovenia, Bosnia & Herzegovina, Kosovo, Montenegro, Albania** and **F.Y.R.O.Macedonia**.

Signotec GmbH was founded in 2000 and is expert in the field of **capturing handwritten electronic signatures** also offering pen-pads and tablet-PCs for special solutions. All pads are characterized by essential unique selling features, for example extra wide body, with high class sensors, a second to none diversity of interfaces, terminal server capability and a lot more.

With **Signotec's** products the user is able to sign as usual while the signature is captured and digitized. **Signotec's** technology optimizes business processes, avoids media breaks, authenticates persons and creates legally compliant documents. Electronic documents being signed in this way can be controlled and checked everywhere and by everyone without any technical complexity. With **Signotec's** signature solutions, signing remains as simple and safe as it has always been. Signing, though, takes place directly within the electronic document. So cost-intensive media breaks due to the use of paper can be prevented, and electronic documents are protected and verified by the digital signature.
