

News Release

CubelQ Announces Asure ID® 7 New Release

[EN] Athens, GR, **September 1st, 2017** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces Asure ID® 7 Card Personalization Software suite new release (7.7.3), now incorporating greater **iCLASS SE Encoder** functionality with **Seos credentials**.

In order to support the growing needs of corporate enterprise, healthcare, and education applications, HID Global announced the latest release, Asure ID® 7.7.3, which provides the ability to manage all keys within a Seos credential. This includes **ADF keys** used to modify the contents of an application on a Seos card, and **GDF keys**, used to define the location of each application and add/remove the application from the credential. Asure ID® users are now able to select between HID Elite™ and user defined keys.

New Asure ID® Capabilities: Additionally, the new Asure ID® 7.7.3 capabilities increase administrator efficiency and create greater ease of use, strengthening HID Global's card personalization offerings. Updates include the following:

- Manage the iCLASS SE Encoder directly using the Asure ID® SDK.
- Users can now utilize HID Elite keys for their MIFARE DESFire EV1 access control data.
- Ability to Live Link™ a Date Field in order to record the print date in an external data source.
- Asure ID® installation package reduced to under 70MB speeding up the overall installation process.
- Supports latest iteration of the FARGO HDP8500 Laser Engraver for the ultimate in visual security.

HID Global encourages all current owners of Asure ID® to download and install the latest update (Asure ID® version 7.7.3), which is available at no charge to current Asure ID® 7 users. This update can also be easily applied from within the application by clicking **Options > Resources > Check For Updates**.

End-users in order to take advantage of the Seos enhancements will need **to update their SE Encoder** as well.
