CubelQ Announces KiMS™ Installation to a Regional Financial Transaction Processor

[EN] Athens, GR, **March 8th, 2018** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces **KiMS™ Installation to a Regional Financial Transaction Processor**.

An Easter Europe regional processor, processing electronic transaction from eft/pos terminals, subsidiary of a German multinational telecommunication organization, following an extensive market and operations analysis decided to adopt **CubelQ's KiMS™** as its primary tool for injecting security keys to servicing customers and owned eft/pos terminals.

Key injection Management System –KiMS currently is injecting TMKs and related security keys to eleven (11) different eft/pos terminal models from four (4) different eft/pos terminal manufacturers.

KiMS™, a new TMK key injection for eft/pos terminals, is CubelQ answer to acquirers servicing multiple eft/pos brands and terminal types from each brand. With KiMS™ acquirers can inject TMKs to eft/pos terminals from more than thirty (30) eft/pos brands, using manufacturer native key injection message protocol.

KiMS™ supports all contemporary Key Types and Key Management algorithms and also supports Key Exchange with multiple Authorizations Hosts using different Key Exchange Keys with each Host. As a high secure system is accessed using dual control and supports users and user group permissions and control privileges.

KiMS™ is a PCI PIN compliant key management system and it is also compliant with the following standards (a) FIPS 140-2 Level 3, (b) ANSI X9.24 part 1 and part 2 - TR-39, (c) RoHS and (d) FCC Part 15 – Class B. KiMS™ is also compliant with the latest version of (a) PCI PIN Security Requirements, (b) VISA PIN Security Program Auditors Guide and (c) VISA Key Injection Facility Auditor Guide.
